

CREATIVE SLANT GEOMETRIC ARTWORK

NOTE: High Res imagery will be required.

What you need:

- REEVES Acrylic Paint 75ml (Colours of your choice)
- JASART Paint Brush / Flat
- Creative Slant Canvases (size of your choice)
- Masking Tape

What you do:

Follow the easy step-by-step instructions below to create your very own Geometric Creative Slant Artwork.

Create large or small artworks by determining the size of your canvas and layout.

1. Lay out each canvas, to determine display order.
2. Turn the canvases over and tape together, using masking tape to keep them from moving apart whilst painting.
3. Attach tape to the canvas to tape off your first geometric sections. Tape all the shapes you wish to paint with the first colour
4. Paint within the taped section. Remove the tape before these areas completely dry.
5. Continue taping off the geometric sections, taping on top of completely dried painted sections to ensure a sharp, crisp edge.
6. Continue until canvas is completely covered painted.
